

**Agriculture, Food and Natural Resources Career Cluster
Aquaculture
Course Number: 03.43100**

Course Description:

The course introduces aquaculture as an important industry of agriculture. Students will learn some of the issues related to fish production that stem from the characteristics of ectothermic animals and the feed efficiency of fish. Students will become aware of how fish obtain oxygen and how the oxygen is dissolved in water and becomes depleted from the water. Through experiments, students will draw conclusions whether there are acceptable levels of oxygen for fish survival. Students will learn the important factors in fish production, including physical characteristics of the water, fish population and water "power of hydrogen" (pH). Students will analyze the various alternative aquaculture crops that can be grown.

Course Standard 1

AFNR-AQU-1

The following standard is included in all CTAE courses adopted for the Career Cluster/Pathways. Teachers should incorporate the elements of this standard into lesson plans during the course. The topics listed for each element of the standard may be addressed in differentiated instruction matching the content of each course. These elements may also be addressed with specific lessons from a variety of resources. This content is not to be treated as a unit or separate body of knowledge but rather integrated into class activities as applications of the concept.

Standard: Demonstrate employability skills required by business and industry.

The following elements should be integrated throughout the content of this course.

1.1 Communicate effectively through writing, speaking, listening, reading, and interpersonal abilities.

Person-to-Person Etiquette	Telephone and Email Etiquette	Cell Phone and Internet Etiquette	Communicating At Work	Listening
Interacting with Your Boss	Telephone Conversations	Using Blogs	Improving Communication Skills	Reasons, Benefits, and Barriers
Interacting with Subordinates	Barriers to Phone conversations	Using Social Media	Effective Oral Communication	Listening Strategies
Interacting with Co-workers	Making and Returning Calls		Effective Written Communication	Ways We Filter What We Hear
Interacting with Suppliers	Making Cold Calls		Effective Nonverbal Skills	Developing a Listening Attitude
	Handling Conference Calls		Effective Word Use	Show You Are Listening
	Handling Unsolicited Calls		Giving and Receiving Feedback	Asking Questions
				Obtaining Feedback
				Getting Others to Listen

Nonverbal Communication	Written Communication	Speaking	Applications and Effective Résumés
Communicating Nonverbally	Writing Documents	Using Language Carefully	Completing a Job Application
Reading Body Language and mixed Messages	Constructive Criticism in Writing	One-on-One Conversations	Writing a Cover Letter

Georgia Department of Education

Matching Verbal and Nonverbal communication		Small Group Communication	Things to Include in a Résumé
Improving Nonverbal Indicators		Large Group Communication	Selling Yourself in a Résumé
Nonverbal Feedback		Making Speeches	Terms to Use in a Résumé
Showing Confidence Nonverbally		Involving the Audience	Describing Your Job Strengths
Showing Assertiveness		Answering Questions	Organizing Your Résumé
		Visual and Media Aids	Writing an Electronic Résumé
		Errors in Presentation	Dressing Up Your Résumé

1.2 Demonstrate creativity by asking challenging questions and applying innovative procedures and methods.

Teamwork and Problem Solving	Meeting Etiquette
Thinking Creatively	Preparation and Participation in Meetings
Taking Risks	Conducting Two-Person or Large Group Meetings
Building Team Communication	Inviting and Introducing Speakers
	Facilitating Discussions and Closing
	Preparing Visual Aids
	Virtual Meetings

1.3 Exhibit critical thinking and problem solving skills to locate, analyze and apply information in career planning and employment situations.

Problem Solving	Customer Service	The Application Process	Interviewing Skills	Finding the Right Job
Transferable Job Skills	Gaining Trust and Interacting with Customers	Providing Information, Accuracy and Double Checking	Preparing for an Interview	Locating Jobs and Networking
Becoming a Problem Solver	Learning and Giving Customers What They Want	Online Application Process	Questions to Ask in an Interview	Job Shopping Online
Identifying a Problem	Keeping Customers Coming Back	Following Up After Submitting an Application	Things to Include in a Career Portfolio	Job Search Websites
Becoming a Critical Thinker	Seeing the Customer's Point	Effective Résumés:	Traits Employers are Seeking	Participation in Job Fairs
Managing	Selling Yourself and the Company	Matching Your Talents to a Job	Considerations Before Taking a Job	Searching the Classified Ads
	Handling Customer Complaints	When a Résumé Should be Used		Using Employment Agencies
	Strategies for Customer Service			Landing an Internship
				Staying Motivated to Search

1.4 Model work readiness traits required for success in the workplace including integrity, honesty, accountability, punctuality, time management, and respect for diversity.

Workplace Ethics	Personal Characteristics	Employer Expectations	Business Etiquette	Communicating at Work
Demonstrating Good Work Ethic	Demonstrating a Good Attitude	Behaviors Employers Expect	Language and Behavior	Handling Anger
Behaving Appropriately	Gaining and Showing Respect	Objectionable Behaviors	Keeping Information Confidential	Dealing with Difficult Coworkers

Georgia Department of Education

Maintaining Honesty	Demonstrating Responsibility	Establishing Credibility	Avoiding Gossip	Dealing with a Difficult Boss
Playing Fair	Showing Dependability	Demonstrating Your Skills	Appropriate Work Email	Dealing with Difficult Customers
Using Ethical Language	Being Courteous	Building Work Relationships	Cell Phone Etiquette	Dealing with Conflict
Showing Responsibility	Gaining Coworkers' Trust		Appropriate Work Texting	
Reducing Harassment	Persevering		Understanding Copyright	
Respecting Diversity	Handling Criticism		Social Networking	
Making Truthfulness a Habit	Showing Professionalism			
Leaving a Job Ethically				

1.5 Apply the appropriate skill sets to be productive in a changing, technological, diverse workplace to be able to work independently and apply team work skills.

Expected Work Traits	Teamwork	Time Management
Demonstrating Responsibility	Teamwork Skills	Managing Time
Dealing with Information Overload	Reasons Companies Use Teams	Putting First Things First
Transferable Job Skills	Decisions Teams Make	Juggling Many Priorities
Managing Change	Team Responsibilities	Overcoming Procrastination
Adopting a New Technology	Problems That Affect Teams	Organizing Workspace and Tasks
	Expressing Yourself on a Team	Staying Organized
	Giving and Receiving Constructive Criticism	Finding More Time
		Managing Projects
		Prioritizing Personal and Work Life

1.6 Present a professional image through appearance, behavior and language.

On-the-Job Etiquette	Person-to-Person Etiquette	Communication Etiquette	Presenting Yourself
Using Professional Manners	Meeting Business Acquaintances	Creating a Good Impression	Looking Professional
Introducing People	Meeting People for the First Time	Keeping Phone Calls Professional	Dressing for Success
Appropriate Dress	Showing Politeness	Proper Use of Work Email	Showing a Professional Attitude
Business Meal Functions		Proper Use of Cell Phone	Using Good Posture
Behavior at Work Parties		Proper Use in Texting	Presenting Yourself to Associates
Behavior at Conventions			Accepting Criticism
International Etiquette			Demonstrating Leadership
Cross-Cultural Etiquette			
Working in a Cubicle			

**Support of CTAE Course Standards and Georgia Standards of Excellence
L9-10RST 1-10 and L9-10WHST 1-10:**

Georgia Standards of Excellence ELA/Literacy standards have been written specifically for technical subjects and have been adopted as part of the official standards for all CTAE courses.

Course Standard 2

AFNR-AQU-2

Learn to work safely in the agriculture lab and work sites, demonstrates selected competencies in leadership through the FFA and agricultural industry organizations, and develops plans for a Supervised Agricultural Experience Program (SAEP).

- 2.1 Explain the role of the Agricultural Education program and the FFA in personal development.
- 2.2 Demonstrate knowledge learned through a SAEP.
- 2.3 Develop leadership and personal development skills through participation in the FFA.
- 2.4 Explore career opportunities in agribusiness through the FFA and Agricultural Education Program.
- 2.5 Explore the professional agricultural organizations associated with the course content.

Course Standard 3

AFNR-AQU-3

Identify and describe trends in the aquaculture industry.

- 3.1 Define and explain aquaculture.
- 3.2 Compare aquaculture to traditional farming.
- 3.3 Analyze the development of aquaculture as a part of agriculture.
- 3.4 Cite evidence of three civilizations that practiced aquaculture more than 200 years ago.
- 3.5 Explore the scope of the aquaculture industry.
- 3.6 Draw a conclusion to why aquaculture is needed.
- 3.7 Identify and provide examples of technological breakthroughs in aquaculture.

Course Standard 4

AFNR-AQU-4

Classify the scientific principles involved in the production of aquatic animals and plants.

- 4.1 Investigate types of aquatic animal and plant production in the United States.
- 4.2 Analyze fish populations in production operations by scientific sampling.
- 4.3 Classify the characteristics of ectothermic animals.
- 4.4 Draw conclusions as to why aquatic crops may be more productive than terrestrial crops.
- 4.5 Analyze uses for aquatic plants besides human food.
- 4.6 Research the morphology, anatomy and physiology of common aquatic animals.
- 4.7 Describe the nine body systems of aquatic animals.
- 4.8 Compare and contrast crustacean's internal anatomy to that of a vertebrate.

Course Standard 5

AFNR-AQU-5

Assess water quality characteristics for aquaculture.

- 5.1 Critique the physical characteristics of water and the relationship to fish production.
- 5.2 Measure and adjust water pH related to fish growth and development.
- 5.3 Investigate how fish obtain oxygen from water.
- 5.4 Analyze how oxygen is dissolved in water.

Georgia Department of Education

- 5.5 Draw conclusions of what causes oxygen to become depleted from water.
- 5.6 Perform scientific tests on pond water to determine dissolved oxygen levels.
- 5.7 Draw conclusions concerning oxygen levels being acceptable for fish to survive and grow.
- 5.8 Apply concepts that add oxygen to water.
- 5.9 Analyze nitrogen compounds in water.
- 5.10 Research and draw conclusions on pH effect on fish health.
- 5.11 Apply concepts for water-chemistry management.
- 5.12 Distinguish turbidity levels in water samples.
- 5.13 Assess the role of temperature in water quality.

Course Standard 6

AFNR-AQU-6

Examine the scientific principles in fish reproduction.

- 6.1 Classify fish according to breed and sex.
- 6.2 Compare the sexual reproduction process of aquatic animals to terrestrial animals.
- 6.3 Evaluate the role of hormones in fish spawning.
- 6.4 Determine the functions and purposes of a fish hatchery.
- 6.5 Research spawning facilities used in aquaculture.
- 6.6 Research harvesting methods used in aquaculture.
- 6.7 Analyze and explain the different phases of fingerling production.
- 6.8 Compare stocking rates for various fish species.
- 6.9 Assess brood fish management.
- 6.10 Assess egg management after fertilization.
- 6.11 Compare production systems for catfish, tilapia, and trout.

Course Standard 7

AFNR-AQU-7

Differentiate controls used in fish reproduction.

- 7.1 Compare water requirements for catfish, tilapia and trout.
- 7.2 Research common diseases for aquaculture fish.
- 7.3 Analyze the effect of bird predation on aquaculture.
- 7.4 Identify and describe the major species of birds that are fish predators.
- 7.5 Create control measures for bird predation.
- 7.6 Identify and provide examples of common weeds in aquaculture systems.
- 7.7 Determine control measures for common weeds.

Course Standard 8

AFNR-AQU-8

Analyze the scientific principles in aquaculture nutrition.

- 8.1 Identify and describe parts of the digestive system of fish.
- 8.2 Research the protein, energy, vitamin and mineral requirements for fish.
- 8.3 Draw conclusions on how anatomy and behavior affect feeding.
- 8.4 List and describe ten essential amino acids.
- 8.5 Categorize essential fatty acids, fat-soluble and water soluble vitamins.
- 8.6 Research methods for preparing feed and feeding fish.
- 8.7 Evaluate ingredients in fish feed.
- 8.8 Assess the importance of winter feeding catfish.
- 8.9 Compare the different feeding practices of different species of fish.
- 8.10 Calculate the amount of feed needed.

- 8.11 Formulate a feed conversion ratio.
- 8.12 Formulate feed cost.

Course Standard 9

AFNR-AQU-9

Investigate the scientific principles of health management of fish.

- 9.1 Analyze behavioral signs of sick fish.
- 9.2 Assess common physical signs of sick fish.
- 9.3 Evaluate signs of stress and disease of fish.
- 9.4 Compose a general management plan for preventing disease outbreaks.
- 9.5 Describe fungal infections.
- 9.6 Investigate common pathogenic parasites of fish.
- 9.7 Compare treatment methods for fish.
- 9.8 Calculate treatments for fish ponds.
- 9.9 Describe the immunization of fish.

Course Standard 10

AFNR-AQU-10

Categorize the management practices for crustaceans and mollusks.

- 10.1 Investigate selection, management and culture of broodstock.
- 10.2 Define spawning, hatchery and raising methods for common crustaceans and mollusks.
- 10.3 Design a plan to culture crawfish.
- 10.4 Analyze the culturing techniques for shrimp, clams and oysters.

Course Standard 11

AFNR-AQU-11

Distinguish the management practices for alligator production.

- 11.1 Analyze problems associated with alligator production.
- 11.2 Investigate uses for alligator products.
- 11.3 Research the requirements for alligator culture.
- 11.4 Research the dietary needs of alligators.

Course Standard 12

AFNR-AQU-12

Justify the management practices for frog production.

- 12.1 Analyze problems associated with frog production.
- 12.2 Research the requirements for frog culture.
- 12.3 Compare the diets of tadpoles to those of frogs.

Course Standard 13

AFNR-AQU-13

Describe the management practices for alternative aquaculture plant production.

- 13.1 Research the various alternative aquaculture crops grown for profit.
- 13.2 Categorize plants used for aquatic plant production.
- 13.3 Research the potential needs for aquatic plants.
- 13.4 Research the methods and facilities used in the production of alternative aquaculture crops.
- 13.5 Analyze economic and production considerations of plant aquaculture.

Course Standard 14

AFNR-AQU-14

Compare the structures and equipment used in aquaculture production.

- 14.1 Differentiate between the four major types of ponds.
- 14.2 Critique sites for pond locations.
- 14.3 Research pond construction requirements.
- 14.4 Analyze site-specific factors and determine costs for pond construction.
- 14.5 Analyze factors used to determine pond size.
- 14.6 Design a pond layout and design.
- 14.7 Compare large versus small ponds.
- 14.8 Define and explain tank and raceway culture.
- 14.9 Analyze advantages and disadvantages of tank and raceway culture.
- 14.10 Define and provide examples of cage culture.
- 14.11 Analyze advantages and disadvantages of cage culture.
- 14.12 Research and design a cage culture.
- 14.13 Analyze aerators used in closed or recirculating systems.
- 14.14 Compare seines used in ponds.
- 14.15 Analyze the need for boats, tractors, trucks and pumps in aquaculture.

Course Standard 15

AFNR-AQU-15

Interpret the marketing practices used in aquaculture production.

- 15.1 Research the process of marketing aquaculture products.
- 15.2 Formulate a marketing plan for an aquaculture product.
- 15.3 Hypothesis potential markets for aquaculture products.
- 15.4 Formulate a budget for an aquaculture product.
- 15.5 Apply concepts to increase the gain of an aquaculture unit while decreasing the input.
